## Cow Project

**The Global Sponsor Cow Project** is one which can bring life saving support to families in some of the world's poorest communities. Poor rural subsistence farmers and cattle keepers who have lost everything due to war, disease and famine are unable to find the resources to rebuild their lives. Often children die as a result of disease and hunger before the family is able to provide adequately in the only way they know how, through the high quality protein foods provided by a cow. Both milk and meat are possible as the herd grows as well as a powerful trading resource. You can help by supporting this effective project, read on.

### **The benefits of keeping a cow:**

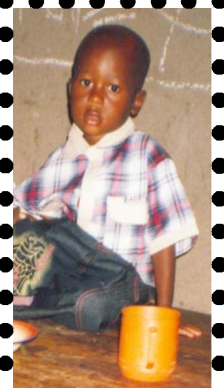

- Producing quality milk and meat to poor families these indigenous animals can make the difference between life and death to poor rural communities.
- Children gain a healthy start to life as well as a strong resistance to sickness and disease due to a strong balanced diet. Milk is also a means of raising much needed extra funds for the family as this 'white gold' is sold to others in the community.
- Once the cow has produced a calf there is another source of finance and provision for everyone concerned as this animal is taken to market for sale or is kept to increase the size of the small herd and the long term sustainability of the family and the community.

### **What does it cost?**

To provide a cow for a family in the developing world costs £200, if you would like to support this project please complete the attached form which allows for a one-off donation or for regular monthly giving. Your support will change the lives of those who are not in a position to help themselves but who will with your generosity be able to get back on their feet again.

Your support will see both children and adult's lives change in such a way that they will be able to sustain themselves, as well as become effective members of the community. Families will be able to trade at market, send their children to school and find the resources to provide medical cover when someone gets sick.
