Fishing Project

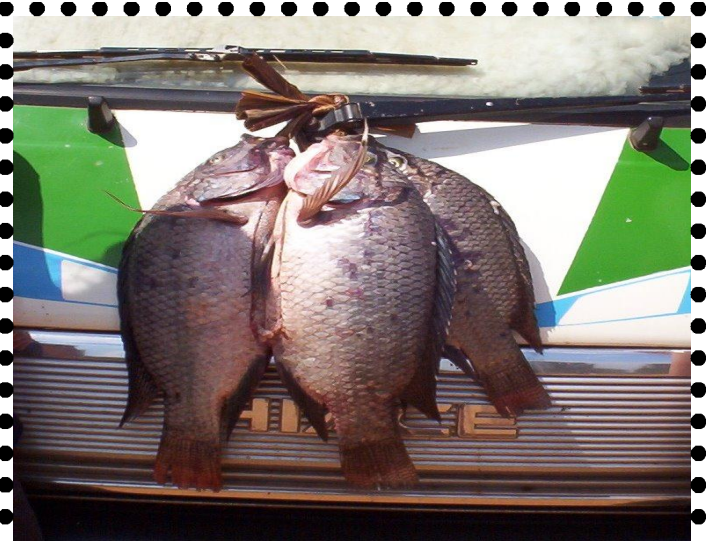

The Global Sponsor Fishing Project

is designed to provide initial capital funding for poor families to set up a fishing small business. Many families live trapped by poverty because their fishing enterprise is not their own. Rich business men own the boats and fishing tackle making it impossible for the fishermen to extricate themselves from the long-term repayments, keeping their income incredibly low. The opportunity to purchase a boat and fishing tackle at low cost can make the difference between a life of poverty and the chance of a better future for the family and for the community. The fisherman can plan to provide for education and medicine for his families and take steps to make sure that their home is secured for the future as well. Please consider supporting this worthwhile project.

What does it cost?

To provide a boat with an outboard motor and some fishing nets will require £2000. However Mission International has set the units of support for this project at £10/month. Your support will break the poverty trap and change the lives of families in the developing world who, frankly, are not looking for a 'hand out' but a 'hand up'. Please complete the attached form if you would like to contribute either a one off donation or on a monthly basis to this very worthwhile project.

The benefits of the fishing project:

Fishing is hard work requiring long hours of time at sea or on the lakes and rivers but is it possible for fishermen to make a good living for themselves and their families. Providing the equipment such as a boat and nets etc often at very low cost allows the fishermen to break free of the high interest loans often levied by unscrupulous lenders. Not only is the fish a source of high protein to be included in the diet of the fisherman's children but he is also able to sell fish at market where he can make a profit to be able to invest further in his small business or to send his children to school or buy suitable medicines when they get sick. The local economy is improved, the education of the young is improved, in fact the knock-on effects of this investment go on and on into the whole community, improving the lives of everyone involved.
